

Mixing Vessel Washers

Automotive - New and remanufacture
Aerospace - General degreasing and cleaning
Food - Cleaning and sanitation
Military - General component cleaning
Medical - Cleaning and sanitation equipment
Metal Treatment - Degreasing and conversion coatings
Pharmaceutical - Cleaning production equipment

RotaJet pan washers are designed for cleaning large mixing pans. The dirty pans are placed onto the lifting lid. Once locked into position, the pan is automatically loaded into the wash chamber using a hydraulic jack system.

The cleaning process is fully automated, and the pans are washed, rinsed and dried, ready for production.

before

after

Systems Available to Clean & Safely Use:

- UV inks: Water based alkaline solutions (122-140 °F)
- Flexo inks: Water based alkaline solutions (122-140 °F)
- Water based paints: Water based alkaline solutions (122-140 °F)
- So Solvent based paints: Water/solvent based solutions (122-140 °F)
- Solvent based paints: Solvent (Ambient)
