

Annual Certification Service

The Benefits of PRI's Certification Process:

PRI's Annual Certification Service gives you peace of mind to know that your equipment is operating properly, within it's design parameters. An overview of the benefits is as follows:

- Meet Regulatory Guidelines
- Assure Ongoing System Reliability
- Gain Annual Instrument Calibration
- Monitor and Assess Operational Status
- Evaluate Component Functionality

What's included in our Annual Certification visit?

PRI Service Technicians will perform checks on the following components of your equipment, to ensure proper functionality and reliability. For detailed information regarding these checks, please see our complete Annual Certifications Guidelines documentation, provided upon request.

- Heating Source
- Electrical Supply
- Control Air Supply
- Cooling Water Supply
- Manual Valve Operation
- Automated Valve Operation
- Control Valve Operation
- Temperature Transmitters
- Review Historical Process
- Review Alarm Data
- Level Transmitters
- Pressure Transmitters
- Pumps
- Visual inspection of entire system
- Operational Testing
- Run a complete cycle
- Submit test documentation
